

1.9 Security. Security is a vital component of the SHARES program. Although not classified, information contained in NCSH 3-3-1, SHARES Directory, is sensitive because of the compilation of station data, and carries a FOR OFFICIAL USE ONLY (FOUO) designation. It is to be controlled, handled, transmitted, distributed, and disposed of in accordance with Department of Homeland Security policy relating to FOUO information, and is not to be released in any manner to the public or other personnel who do not have a valid need-to-know. Where there is uncertainty as to a person's need-to-know, the information holder will request dissemination guidance from the SHARES Project Office. REPRODUCTION: The SHARES Directory will not be photocopied or electronically reproduced. If required, additional copies are available from the SHARES Project Office. STORAGE: When unattended, FOUO material will be stored in a locked file container, or in a room with sufficient physical access control measures to afford adequate protection and prevent unauthorized access. If the FOUO information is stored on a computer, access to the information must be password protected. ELECTRONIC TRANSMISSION: FOUO information may be sent via non-secure FAX and by e-mail. The sender will be reasonably assured that the information will not be left unattended or subjected to possible unauthorized disclosure on the receiving end. DISPOSAL: FOUO material will be disposed of in such a manner as to ensure destruction beyond recognition and reconstruction. After destruction, materials may be disposed of with normal waste. SHARES members leaving the program shall destroy their copy(s) of NCSH 3-3-1 and notify the SHARES Project Office of the date of destruction. The SHARES Directory may be returned to the SHARES Project Office at any time for destruction. The loss, compromise, suspected compromise, or unauthorized disclosure of FOUO information will be reported to the SHARES Project Office. MONITORING: SHARES on-air operations are subject to monitoring. Participation in SHARES constitutes consent of monitoring. Results of such monitoring are provided to the SHARES Project Office for non-attribution purposes. PRIVACY ACT: Information voluntarily provided on SHARES Form 1, SHARES Station Data Form, is covered by the Privacy Act of 1974. The information is stored on the Master SHARES Data Base and used by Project Office personnel to contact SHARES members. Information provided in Part 1 is also included in NCSH 3-3-1 and distributed to SHARES members as FOUO information. Failure to provide the information requested on the SHARES Form 1 may result in not being allowed to participate in SHARES. COMPLIANCE: Failure to comply with this security policy to protect information contained in NCSH 3-3-1 from unauthorized personnel shall result in removal from the SHARES HF Radio Program.

## SHARES Response - Columbia Disaster

*WWJ98 (DOT-ID)*. "At 1502Z, AFA4MK (TX) formally opened a SHARES net on SCN Channel 2 taking check-ins with the help of AAR4LL (TN). Great job, making America stronger through SHARES."

*AFA4MK (AF MARS-TX)*: "I would like to thank all check-ins for their orderly and patient demeanor."

*NNN0VUV (N-MC MARS-CA)*: "Members supporting this operation are to be commended. Job well done!"

*DLA 303 (DLA-WA)*: "I knew that the SHARES Net would respond to this event. Good work!"

### Member Comments Following Columbia Emergency Operation

As the nation was riveted on the fate of the Space Shuttle Columbia and its crew following initial reports of a disaster during Columbia's reentry into the earth's atmosphere on the morning of February 1, 2003, SHARES Coordination Stations spontaneously responded by establishing national and regional SHARES nets. SHARES stations around the country also immediately responded to this unfolding national disaster. During the first critical hours, 102 SHARES stations submitted Station Availability Reports. Response by SHARES members during this Emergency Operation once again demonstrated the spontaneity and timeliness of SHARES response to emergency situations.

NCSH 3-3-1

## CHAPTER 1: INTRODUCTION

1.1 Purpose. This Handbook provides a directory listing of National Communications System (NCS) high frequency radio stations which are currently identified to participate in the SHARed RESources (SHARES) High Frequency (HF) Radio Program.

1.2 Scope and Applicability. This Handbook, with the associated *Shared Resources (SHARES) High Frequency (HF) Radio Program User Manual*, is for use by NCS and other executive entities that voluntarily elect to participate in the SHARES HF Radio Program.

1.3 Authority. This Handbook is issued under the authority of *NCS Directive 3-3, Shared Resources (SHARES) High Frequency (HF) Radio Program*, September 30, 1988.

### 1.4 References.

- a. *NCS Directive 3-3, Shared Resources (SHARES) High Frequency (HF) Radio Program*, September 30, 1988.
- b. *NCS Manual 3-3-1, Shared Resources (SHARES) High Frequency (HF) Radio Program User Manual*, August 1, 1995.
- c. *SHARES Coordination Network Operational Instruction*, August 23, 1996.
- d. *National Telecommunications and Information Administration (NTIA), Manual of Regulations and Procedures for Federal Radio Frequency Management*, current edition.

1.5 Policy. Policy pertaining to the use of this Handbook is established by *NCS Directive 3-3, Shared Resources (SHARES) High Frequency (HF) Radio Program*, approved by the Executive Office of the President (EOP) on September 30, 1988.

1.6 Responsibilities. Responsibilities of the NCS and other executive entities participating in the SHARES HF Radio Program are identified in *NCS Directive 3-3*. Requirements, procedures, and schedules for updating this Handbook are established by the SHARES HF Interoperability Working Group. Administrative management and support for these functions are provided by the Office of the Manager, NCS. This Handbook is published as an NCS issuance for Federal and Federally affiliated SHARES participants. Participants shall identify stations and establish distribution requirements.

-Distribution: NCS

January 24, 2002

NCSH 3-3-1

### 1.7 Handbook Organization and Use.

a. This Handbook is used for interagency HF radio relay of SHARES message traffic using instructions and operating procedures contained in NCS Manual 3-3-1.

b. Chapters 2 through 6 contain alphabetical listings of radio stations identified as SHARES program participants. Chapter 2 lists all stations by state and city. Chapter 3 lists overseas stations by country and city. Chapters 4 and 5 list all stations alphabetically by agency and station voice call sign, respectively. Chapter 6 lists only those stations that have an Automatic Link Establishment (ALE) capability by ALE address code.

c. Information contained in this Handbook includes station location, agency, call sign, telephone number, capability, and frequencies. The first and second columns list the station location, providing city, state, and latitude/longitude. The latitude/longitude coordinates are provided for antenna positioning and direction finding. The third column lists the agency affiliation of each station. Abbreviations are defined in paragraph 1.9. The fourth column contains station call signs. Each station may list up to three call signs in Chapters 2-5. The first call sign is listed for every station, and is used for voice operations. The additional two call signs are listed only if the station has a digital (BBS) or transportable (STAR) capability, and are identified accordingly. ALE address codes are listed in the ADDRESS CODE column in Chapter 6.

d. The telephone number is used by emergency response personnel to contact a station when the Public Switched Network is operable. The second telephone number, when listed, is the station Defense Switched Network (DSN) number.

e. Station capabilities are listed as an alphanumeric code under the CAPABILITY column in Chapters 2 through 6. The alpha character(s) indicates the station's Modes of Operation. The numeric character indicates the station's Time of Operation. The alphanumeric codes are:

#### Modes of Operation

A - SSB Voice	I - ALE	P - PACTOR/PACTOR II	T - Transportable
E - HF E-mail	M - Phone Patch	Q - FS 1052 (Modem)	U - MILSTD 188-110b
G - GTOR	N - AMTOR	R - CLOVER 2000	V - PSK31
H - Packet	O - CLOVER	S - STI	

January 24, 2002

NCSH 3-3-1

Time of Operation

1 - 24-Hour

2 - Part Time

3 - On Call

An "A1" station indicates that the station uses single side band (SSB) voice and operates 24 hours a day. An "AOPT3" capability code indicates that the station is not normally on the air. When available, however, the station is capable of operating voice, CLOVER and PACTOR digital modes. The station is also capable of being transported and operated from locations other than the location listed in the directory. An "AOI2" capability code indicates that the station is operational on a scheduled basis (schedule unspecified), is voice and CLOVER capable, and can operate using FS 1045, Automatic Link Establishment (ALE).

f. The CAPABILITY column in Chapter 6 indicates the period the station is operating on ALE frequencies. For example, an "I2" code indicates that the station conducts ALE operations on a scheduled basis (schedule unspecified).

g. Frequencies listed in the Handbook are "window" frequencies that should be entered in and displayed by the radio as listed. When either upper or lower sideband is selected, the radio automatically makes adjustments so that the center of emission is operating on the "assigned" frequency. Frequencies listed in the Handbook are upper sideband unless indicated as lower sideband with the symbol "+." Frequencies which are marked by the symbol "\*" have been identified as primary frequencies, and are those frequencies most monitored of the frequencies listed. Frequencies used exclusively for ALE operations, as discussed in paragraph 1.8(h), are listed separately in Chapter 6. Use the frequency assignments listed in the Handbook in accordance with provisions of Section 7.3.1 of the National Telecommunications and Information Administration (NTIA), Manual of Regulations and Procedures for Federal Radio Frequency Management.

h. SHARES Forms. SHARES Form 1, *SHARES Station Data Form*, is used to add or delete a station and to update information listed in this Directory. Instructions for completing and submitting Form 1 are contained in NCS Manual 3-3-1. All deletions or additions of stations, or changes to call signs or frequencies, must be authorized by a SHARES Point of Contact. SHARES Form 2, *SHARES Message Form*, is used to format SHARES messages. SHARES Form 3, *SHARES Station (Events) Log*, is used to track station activity during an operation. SHARES Form 4, *Federal Registry of ALE Address Codes Form*, is used to register ALE address codes. SHARES Form 5, *Confirmation Card*, is used to acknowledge participation in a SHARES operation.

January 24, 2002

NCSH 3-3-1

1.8 Operations.

a. To process a SHARES message, locate a SHARES station close to the message destination and attempt contact on one of the frequencies listed in the FREQUENCIES column. The primary frequency is indicated by an asterisk. If contact cannot be established on any of the listed frequencies, refer again to the SHARES Directory; select another station located near the message destination, and attempt contact.

b. The purpose of the 10-channel SHARES Coordination Network (SCN) is to coordinate SHARES on-air operations. SHARES stations may use the SCN to submit Station Availability Reports to SHARES Coordination Stations during an operation, to list SHARES messages for processing, to conduct training, and to support Federal, state, and industry events that may require backup communications. SHARES messages should not be passed on SCN Channels 1 and 2. Channels 1 and 2 are used only to coordinate the transmission of a SHARES message. SHARES messages may be passed using Channels 3 through 10 in the assigned mode. Once coordination is complete on SCN Channels 1 or 2, process message traffic using "working frequencies" listed in the SHARES Directory for either the sending or receiving station. The SCN channel assignments, frequencies, and modes of operations are:

Channel 1:	Voice	5236.0	Channel 6:	ALE	11217.0
Channel 2:	Voice	14396.5	Channel 7:	ALE	15094.0
Channel 3:	ALE	4490.0	Channel 8:	ALE/STI	17487.0
Channel 4:	ALE	5711.0	Channel 9:	BBS	6800.0
Channel 5:	ALE	9106.0	Channel 10:	BBS	13242.0

Channels 1 and 2 are designated for voice operations. Use the radio operating procedures outlined in NCS Manual 3-3-1 when operating on the SCN voice channels. Channels 3 through 8 are designated for ALE operations as discussed in paragraph 1.8(h). Channel 8 is also identified for shared use by ALE and users of the SHARES Telephone Interface (STI). Channels 9 and 10 are designated for SHARES HF Bulletin Board System (BBS) operations using AMTOR, PACTOR, GTOR, and CLOVER modes of transmission. Operations will be in accordance with standard procedures for each digital mode. Channels 9 and 10 are monitored by KGD34, the SHARES Master Coordination Station (SMCS), SHARES Digital Coordination Stations, and other Stations supporting the SHARES BBS.

**FOR OFFICIAL USE ONLY**

January 24, 2002

NCSH 3-3-1

c. SHARES Coordination Stations (SCS) monitor the SHARES Coordination Network (SCN) and coordinate on-air activities during SHARES operations. The SCS stations receive Station Availability Reports, forward them to the SMCS, and coordinate the transmission of SHARES traffic listed on the SCN. The SHARES Coordination Stations are:

<u>SCS CALL SIGN</u>	<u>CALL SIGN</u>	<u>AGENCY</u>	<u>LOCATION</u>
SMCS	KGD34	NCC	Arlington, VA
SCS NORTHEAST	AAR1DD	ARMY MARS	West Hartland, CT
SCS EAST	WGY9900	ARC	Falls Church, VA
SCS CENTRAL	AFA3HY	AF MARS	Shawnee, KS
SCS SOUTHEAST	WPEH728	AT&T	Conyers, GA
SCS SOUTH	WUG3	USACE	Vicksburg, MS
SCS SOUTH CENTRAL	WNIM867	SBC	San Antonio, TX
SCS MOUNTAIN	KCP63	FAA	Longmont, CO
SCS SOUTHWEST	NNN0VUV	N-MC MARS	Costa Mesa, CA
SCS WEST	KHA908	NASA	Mountain View, CA
SCS NORTHWEST	DLA303	DLA	Bremerton, WA

d. Regional Coordination Stations (RCS) coordinate SHARES activities in five regions of the U.S. on SCN Channel 1. These stations work closely with the SHARES Coordination Stations to assist in processing Station Availability Reports and coordinating traffic between stations located in close proximity to each other. Current Regional Coordination Stations are:

<u>RCS CALL SIGN</u>	<u>CALL SIGN</u>	<u>AGENCY</u>	<u>LOCATION</u>
RCS NORTHEAST	AFA1NY	AF MARS	Conestoga, PA
RCS SOUTHEAST	SOUTHEAST CAP 46	CAP	Hampton, GA
RCS CENTRAL	AAR7AL	ARMY MARS	Overton, NE
RCS NORTHWEST	WWJ98	FHWA	Pocatello, ID
RCS SOUTHWEST	NNN0QOV	N-MC MARS	Yuma, AZ

e. Digital Coordination Stations (DCS) coordinate SHARES Bulletin Board System (BBS) activity. These stations monitor SCN Channels 9 or 10 on a regular basis to support SHARES BBS message traffic. The Digital Coordination Stations are:

<u>DCS CALL SIGN</u>	<u>BBS CALL SIGN</u>	<u>AGENCY</u>	<u>LOCATION</u>
DCS NORTHEAST	NN0TDU	N-MC MARS	Falmouth, ME
DCS EAST	AAT3BF	ARMY MARS	Newark, DE
DCS SOUTHEAST	NN0ELA	N-MC MARS	Salem, SC

FOR OFFICIAL USE ONLY

January 24, 2002

NCSH 3-3-1

DCS CENTRAL	WWJ85	FHWA	Ames, IA
DCS NORTHWEST	NN0AJK	N-MC MARS	Moscow, ID
DCS WEST	KHA908	NASA	Moffett Field, CA
DCS ALASKA	WUJ5	USACE	Anchorage, AK

f. In order for the SHARES Emergency Coordination Team (SECT) to better track SHARES availability during an emergency, and for Coordination Stations to process traffic listed on the SCN, stations available to support SHARES operations are requested to provide a Station Availability Report.

g. The Station Availability Report consists of a station's **call sign**, the **state** in which the station is located, and **availability** of the station to support the operation. Station Availability Reports are submitted upon first checking in with a Coordination Station during a SHARES operation. An example of a Station Availability Report is:

**THIS IS KGD34, VIRGINIA, UNTIL 1700Z, OVER.**

Station Availability Reports may be submitted by voice on SCN Channels 1 and 2, by using ALE on SCN Channels 3 through 8, and through the SHARES BBS on SCN Channels 9 and 10.

h. In order to coordinate transmitting a SHARES message using SSB voice, a station may utilize SCN Channel 1 or 2 to "list" the message by stating the destination city and state. Once the message is listed, a Coordination Station will assist in identifying a station near the destination city, and coordinate selecting a working frequency from those listed under the FREQUENCIES column in the SHARES Directory to transmit the message.

i. Automatic Link Establishment (ALE) is designated for use on Channels 3 through 8. SHARES stations are encouraged to program these six frequencies into their ALE radios. Sounding to determine Link Quality Analysis can be enabled to measure connectivity with other ALE stations, but should not be more frequent than at two-hour intervals. ALE address codes and ALE frequencies are listed in Chapter 6. To initiate a call using ALE, refer to the address code and frequencies shown in Chapter 6. The availability of ALE operations may be different from the hours of operation for voice as indicated in Chapters 2 through 5. The CAPABILITY column in Chapter 6 includes a station's ALE monitoring period. Stations electing to operate on SCN Channels 3 through 8 should submit a SHARES Form 1 to update Chapter 6.

January 24, 2002

NCSH 3-3-1

j. The SHARES BBS Network supports digital operations on the SHARES Coordination Network. Stations having a digital capability can monitor SCN Channels 9 and 10 to receive SHARES messages. Upon completion of any on-air activity involving SCN Channels 9 and 10, stations should submit SHARES Form 3, *SHARES Station (Events) Log*, citing time of operation, station links, and number of messages processed.

k. The SHARES Telephone Interface (STI) Network allows the integration of automatic and manual phone-patch capability to connect users of SHARES with either inbound or outbound telephone connectivity. In addition to other working frequencies, Channel 8 of the SHARES Coordination Network is designated for STI use. Stations monitoring this channel during SHARES operations have demonstrated the ability and willingness to conduct phone patches with any SHARES user. Stations needing a phone patch should call using the ANY CALL procedure contained in NCSM 3-3-1, transmitting "ANY STATION WITH STI CAPABILITY, THIS IS (your call sign), OVER." Stations having an STI capability and electing to monitor Channel 8 for STI traffic during emergencies should periodically broadcast "THIS IS (your call sign) MONITORING FOR STI TRAFFIC, OVER." Stations participating in the STI LITY column. A SHARES user can have connectivity from or to any telephone or radio during a disaster using STI. For users initiating contact from a telephone, the COTHEN Service Center of the U.S. Customs Service will answer at 800-529-7319, and connect the user into any ALE equipped or standard HF radio.

l. The SHARES Transportable Auxiliary Radio (STAR) Network consists of stations that are transportable. These stations use a STAR call sign identified in the CALL SIGN column when operating from a mobile or remote location. STAR stations operate using the same procedures used for any fixed station.

m. Limited e-mail over HF radio is available through SHARES. Some SHARES stations nationwide have incorporated various HF e-mail systems into their stations and continue to demonstrate its application in SHARES emergency communications. Using the latest technologies, e-mail messages transmitted over HF utilize TCP/IP and other protocols to deliver messages to the addressee's e-mail account. Prior coordination with the station operator may be required. SHARES stations with an HF e-mail capability carry the station CAPABILITY code "E" in the SHARES Directory.

January 24, 2002

NCSH 3-3-1

n. To promote SHARES readiness and interoperability, a Weekly SHARES Net is conducted every Wednesday from 1600Z to 1800Z. To participate in the net, a station should transmit a Station Availability Report to one of the Coordination Stations conducting the net. SCN Channels 1 and 2 are used for regional and national voice check-ins. Channels 3-10 are used for checking-in using the SHARES BBS and ALE.

o. SHARES exercises are conducted each April, August, and December. Exercises are the cornerstone of SHARES training and maintaining the capability of SHARES to respond during the critical first hours of an emergency. For this reason, all SHARES stations are encouraged to participate. Prerequisites for exercise participation are: 1) Transmit a Station Availability Report to a SHARES Coordination Station, and 2) prepare and transmit a SHARES formatted message to another SHARES station. A SHARES Exercise Notice is issued to all SHARES stations and SHARES Points of Contact two weeks in advance of each exercise. Notices are distributed electronically by e-mail and are posted on the SHARES BBS and SHARES home page.

p. Some entities participating in SHARES operate HF radio networks which consist of considerably more stations than are listed in the SHARES Directory. The Civil Air Patrol (CAP) and the DOD Military Affiliate Radio System (MARS), for example, consist of thousands of stations capable of supporting SHARES. Because most of these stations monitor and operate on agency frequencies, contact can be initiated by accessing any of the CAP or MARS primary frequencies listed in the SHARES Directory, and issuing the general call "ANY STATION, ANY STATION, ANY STATION, THIS IS (your call sign), OVER." Utilizing these networks for SHARES messages is permitted as long as either the station sending the message or the station receiving the message is a SHARES station.

q. SCN Operational Levels are designed to improve the responsiveness of the SCN during emergencies. The SCN Operational Level Change Notice is used to notify members of changes in SCN Operational Levels. Notices are sent electronically and posted on the SHARES BBS and home page. It is not the intent of the Notice to direct the activation or participation of any SHARES station during any operation. Participation in any SHARES operation is on a voluntary basis in accordance with the policies governing SHARES. The SCN Operational Levels are:

(1). **Operational Level 3** - No emergency exists. The 10-channel SCN may be used for training, the weekly SHARES net, and exercises.

(2). **Operational Level 2** - Emergency potential exists. Exercises on the SCN suspended. SCN monitoring increased. Check-in windows are established on the national and

FOR OFFICIAL USE ONLY

January 24, 2002

NCSH 3-3-1

regional nets to receive Station Availability Reports.

(3). **Operational Level 1** - Emergency exists. SHARES message support required. National and regional nets maintain full-period operations to receive Station Availability Reports, to list SHARES message traffic, and coordinate the processing of SHARES messages.

r. The following SHARES message format replaces the format in NCSM 3-3-1, SHARES Manual, page 3-1, para 3.2, and SHARES Form 2, SHARES Message Form. This revised format will be incorporated into the next edition of the SHARES Manual. Precedence used in SHARES includes FLASH, IMMEDIATE, PRIORITY, and ROUTINE.
